ABOUT ME

As a Front-End Developer, I possess strong expertise in coding languages and front-end technologies. My proficiency includes JavaScript, HTML, CSS, and related frameworks, enabling me to develop and optimize user-centric web applications. With hands-on experience, I have successfully completed several projects in web development, ensuring responsiveness, functionality, and seamless user experiences.

INTERNSHIPS

Web Development (Code Soft)

- Completed a 1-month internship in web development at Code Soft
- Worked on the portfolio, product landing page, and Netflix front-end clone projects.
- Gained practical experience in various aspects of web development during the internship

Web Development Intern (CodeClause)

- Completed a 1-month internship in web development at CodeClause.
- Worked on the portfolio, product landing page, and calculator projects.
- Gained practical experience in various aspects of web development during the internship.

PROJECTS

Internship Website

- Ensured full responsiveness across all devices for optimal user experience.
- Utilized a combination of HTML, CSS, JavaScript, and Bootstrap icons to build and enhance website functionality
- Developed internship website with four main sections: Home, Domain, Pricing and Contact.
- Included a Follow Us section with social media icons
- Ensured responsiveness across all devices (mobile, laptop, tablet).

Major Project

Credit Card Fraud detection using Machine Learning

- Role: Front-End Developer
- Technologies: HTML, CSS, JavaScript
- Key Contributions:
 - Developed a responsive UI for fraud detection insights
 - Implemented interactive data visualization
 - Optimized user experience and accessibility
 - Integrated front-end with machine learning models
