FULL STACK DEVELOPER (React | Next.js | Node.js)

Full Stack Developer with 1+ years of experience building scalable web applications using Next.js, React.js, TypeScript, Node.js, Express.js, MongoDB, and MySQL. Experienced in developing REST APIs, authentication systems, role-based access control, payment gateway integrations, and cloud-based media management. Skilled in delivering production-ready applications with a focus on performance, scalability, and user experience.

PROFESSIONAL EXPERIENCE

Software Developer | Tamar Software | Noida, Uttar Pradesh

June 2025 – Present

- Developed and maintained 5+ production-grade web applications using React.js and Next.js, improving performance, page load times, and overall user experience.
- Implemented modern, responsive, and accessible user interfaces using Tailwind CSS and component-based architecture.
- Built scalable backend services with Node.js and Express.js, designing RESTful APIs for seamless frontend-backend communication.
- Integrated third-party APIs and services to enhance application functionality and automate business workflows.
- Designed and optimized database queries reducing API response time by 30% for efficient data storage, retrieval, and scalability.
- Implemented secure payment processing workflows using Razorpay Payment Gateway for online transactions and checkout automation.
- Integrated Cloudinary for image upload, storage, optimization, and content delivery.
- Developed authentication and authorization systems using JWT and role-based access control.
- Collaborated with cross-functional teams to troubleshoot issues, perform code reviews, and deliver high-quality solutions.
- Wrote clean, modular, and reusable JavaScript code following industry best practices.

PROJECTS

E-Commerce Platform

Tech Stack: Next.js (App Router), TypeScript, Tailwind CSS, MongoDB, NextAuth, Cloudinary

- Built a scalable full-stack e-commerce application with authentication, product management, and order processing features.
- Implemented secure JWT-based authentication and role-based access control.
- Integrated payment gateway for seamless online transactions and checkout experience.
- Developed REST APIs and MongoDB models for products, carts, users, and orders.
- Created responsive and SEO-optimized frontend using Next.js and modern UI practices.

Food Delivery Web Application

Tech Stack: Next.js (App Router), TypeScript, Tailwind CSS, MongoDB, NextAuth, Cloudinary

- Developed a full-stack food delivery platform using Next.js App Router, handling frontend and backend in a unified framework.
- Implemented secure user authentication and authorization using NextAuth with JWT sessions.
- Designed a responsive modern interface with Tailwind CSS for consistent cross-device compatibility.
- Integrated MongoDB for users, restaurants, and orders, and used Cloudinary for optimized media delivery.
- Applied TypeScript throughout the project to improve type safety, maintainability, and scalability.

HR Management System (HRMS)

Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, MySQL

- Built an HRMS to manage employee records, leaves, and attendance.
- Implemented role-based authentication for Admin, HR, and Employee users.
- Designed REST APIs for attendance, leave management, and employee records.
- Implemented JWT-based authentication, role-based authorization, and protected dashboards.

CORE SKILLS

Frontend	Next.js, React.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3
Backend	Node.js, Express.js, REST APIs, Authentication (JWT, NextAuth)
Database	MongoDB, MySQL
Tools & Platforms	Git, GitHub, Postman, VS Code, Cursor
Concepts	RBAC, MVC, Responsive Design

EDUCATION

- MCA, AKTU University | 2023
- B.Sc. Computer Science, CCS University | 2020
